

# Rhododendron ponticum

Scan for more information

## Species Description

**Scientific name:** *Rhododendron ponticum*

**AKA:** Rhododendron

**Native to:** South-west Europe and south-west Asia. Northern Ireland's stock is believed to have come from Spain

**Habitat:** Common on acid, peaty or sandy soils in woodland, heathland, rocky hillsides, rivers banks, gardens and parks

A large evergreen shrub with leathery leaves, attractive purple to pink flowers and solid stems forming into a trunk when mature. Relatively easy to identify by its distinctive flowers but can be confused with cherry laurel or horticultural varieties of rhododendron. However, horticultural varieties of rhododendron are relatively rarely found in the wild. Spreads by suckers and seed, which are small and carried long distances by wind.

Introduced by gardeners in the late 18th century into parks and woodlands, where it was also used for game cover. Still widely planted, particularly by gardeners. Often grows in ecologically sensitive habitats, such as heath, broad-leaved woodland and dunes, where dense growth out-competes native plants and can considerably alter the structure of the habitat. Rhododendron can also prevent access to sites by the sheer mass of plant material blocking paths and right of way.

## Key ID Features

Leathery leaves with dull green upper surface

Pale underside

6-12 cm

Stem usually up to 15cm diameter and 5m tall

Stems / trunk often dense and twisted

Usually pink / purple, occasionally whiteish

5 petals

Leaves in spiral at end of stem

Seed pods are formed after flowering

3 cm

# Identification throughout the year

Varies little throughout the year as leaves are evergreen and woody stems remain the same. Flowers appear May to June followed by seed pods.

## Cherry laurel

Non-native  
(*Prunus laurocerasus*)

Leaves arranged alternately ending in a single leaf

Flower heads white and clustered to form a spike

Rhododendron leaf  
(for comparison)

Cherry laurel leaf

Toothed edge

Glossy surface

# Distribution

Widespread throughout Northern Ireland

## Varieties of Rhododendron

Examples of rhododendron varieties:

There are a large number of highly sought after species and varieties of rhododendron, of which the invasive *Rhododendron ponticum* is just one. It is unusual to encounter other varieties or species outside of planted habitats.

References in the further reading list can be used to distinguish between the different varieties if necessary.
