

Fishing abroad?

Diseases and invasive species kill fish. Don't bring them back.

Protect the environment and the sport you love:

CHECK

Check your equipment, clothing and footwear when you leave the water. Remove any muck or plant material and put it in the bin.

CLEAN

Clean everything thoroughly as soon as you can. Use hot water if possible.

DRY

Dry everything for as long as you can before using it at home as some species can live for over two weeks in damp conditions.

Find out more about invasive plants and animals and how you can help to stop the spread at:
